

In 2009, in frames of European Federation of Food Science & Technology (EFFoST), the Armenian Society of Food Science & Technologies (ASFoST) was established. It includes European Hygienic Engineering and Design Group (EHEDG) – Armenia and is one of the founders of Black Sea Food Science and Technology (B-FOST).

### The main objectives:

- Application of specially prepared industry guidelines in food processing companies
- Acting as liaison between Armenian government and food processing companies in the field of food safety.

### ASFoST activities:

- Organizing seminars and trainings for food processing companies,
- Organizing round tables with food producers,
- Participating in national and international projects,
- Preparation of materials, information lists and booklets, Participating in EHEDG working groups (Fish processing, Hygiene of Meat) activities,
- Cooperating with European groups specialized in the implementation of new production lines and matching schemes of quality and hygiene control,
- Translating the specially prepared industry guidelines in to Armenian language.
